-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Note new examiner.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pollitt et al (WO 98/21159) in view of evidence (product brochures) submitted by applicant on June 1, 2004.

Rejection is maintained with following response.

More than a half of silica sand disclosed in said product brochures meets the instant limitation of aluminum oxide and ferrous oxide. Thus, the use of such silica sand would be a *prima facie* obviousness. Applicant further submits product brochures showing various sands, a majority being outside scope of the invention. However, close to a half of silica sand in all of product brochures submitted by applicant falls within the scope of the claim.

Applicant asserts that the instant silica sand shortened setting time and improved overall strength of the product. However, there is no evidence supporting applicant's position, and the statement alone has no probative value.

Claims 1, 2, 5-9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pollitt (GB 2,322,630) in view of evidence (product brochures) submitted by applicant on June 1, 2004.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
